Tipi Carousel access for all play

General Notes:

Specifications

WOW, a spinning Tipi! The whimsical shoppes of the Tipi carousel with top brace attracts children in its own right. And they will play here again and again, thanks to the multifunctionality of the slick Tipi. Responsive to children's movements, the Tipi spins when pushed or pulled. Apart from being a fun negotiation and turn-taking game, the pushing and pulling build muscles and cardio. In the Tipi children can lie, sit or stand with the support of the side bars or the top frame. This welcomes children with mobility disabilities to be part of the play, too. The spinning movement trains the sense of space and balance. The sense of balance is fundamental to all other motor skills and is important for motor control, for instance being able to sit still or cycle securely, without falling. The Tipi facilitates universal, inclusive play. It's good fun!

This product, Tipi Carousel with Top Brace (ETL400051), is provided by KOMPAN Ireland.

Sensory Play Panel

Stimulate the touch, sight and sound senses with the Sensory panel.

The Sensory Panel is an engaging panel with various activities to stimulate touch, sight and sound senses. The panel has a great selection of activities including tumble ball and spiral spinners, roller ball seed pods, tactile leaves, coloured window and sliding counters. This is a compact, fun panel that will keep children of all abilities engaged and busy, with lots to do and explore. Made from tough, durable, and safe HDPE which is 100% recyclable. BS EN 1176 – Designed to British & European Standards.
